HUMAN STUDY

J. H. VAN WIJNEN, P. CLAUSING, AND B. BRUNEKREEF. Estimated Soil Ingestion by Children 147

IN VIVO STUDIES

LUDMIŁA WĘGLARZ, MARIAN DRÓŻDŻ, MARIA WARDAS, BOGUSŁAW KULA, AND MARIA PAWLACZYK-SZPILOWA. Usefulness of Fibroblast Culture for Testing of Cattle Tissues Polluted with Heavy Metals. 163

CHENYANG SHI, ALFRED T. LANE, AND THOMAS W. CLARKSON. Uptake of Mercury by the Hair of Methylmercury-Treated Newborn Mice 170

GLORIA A. SKOWRONSKI, RITA M. TURKALL, ABDEL RAZAK M. KADRY, AND MOHAMED S. ABDEL-RAHMAN. Effects of Soil on the Dermal Bioavailability of *m*-Xylene in Male Rats 182

DANIEL DZIEDZIC, ELAINE S. WRIGHT, AND NICHOLAS E. SARGENT. Pulmonary Response to Ozone: Reaction of Bronchus-Associated Lymphoid Tissue and Lymph Node Lymphocytes in the Rat . 194

D. R. GOLDBERG AND T. M. YUILL. Effects of Sewage Sludge on the Immune Defenses of Mallards 209

IN VITRO STUDY

HOLGER GULYAS, MARIA LABEDZKA, AND GUENTHER GERCKEN. Depression of Alveolar Macrophage Hydrogen Peroxide and Superoxide Anion Release by Mineral Dusts: Correlation with Antimony, Lead, and Arsenic Contents. 218

ANNOUNCEMENTS 230

AUTHOR INDEX FOR VOLUME 51 232

NOTICE

The Subject Index for Volume 51 will appear in the December 1990 issue as part of a cumulative index for the year 1990.

INSTRUCTIONS TO AUTHORS

Manuscripts. Environmental Research publishes original reports describing studies of the toxic effects of environmental agents in humans and animals. The principal aims of the journal are to define the etiology of environmentally induced illness, and to increase understanding of the mechanisms by which environmental agents cause disease.

The study of environmental health is inherently multidisciplinary. Therefore, the journal welcomes relevant articles in:

- epidemiology and risk analysis
- toxicology
- environmental and occupational medicine
- the neurosciences
- pathology
- pharmacology
- reproductive biology
- biochemistry
- molecular and cellular biology
- mineralogy

Reports which bridge one or more of these disciplines will be particularly encouraged, as will studies employing biological markers of toxic exposure and effect.

Occasional critical reviews and selected book reviews will be included.

Submission of Manuscripts. Three copies (an original and two copies) should be submitted to:

Environmental Research
Editorial Offices
Division of Environmental and Occupational Medicine
Department of Community Medicine
Mount Sinai School of Medicine
1 Gustave L. Levy Place, Box 1057
New York, NY 10029

The original and two copies must include photocopies of all tables and figures.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Environmental Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

All papers will be published in English.

Form of Manuscript. Manuscripts should be typewritten (not mimeographed) with double or triple spacing and wide margins on high-quality bond paper. Subdivision of the article into *Abstract* (50–200 words), *Introduction, Materials and Methods, Results, Discussion, Conclusions, Acknowledgments, and References* is recommended. In addition, section headings are often useful.

Page 1 of the manuscript should contain the article title, author's name, and affiliation (include zip code where applicable). Page 2 should contain a proposed running head of fewer than 40 characters and the address of the person to whom proofs are to be sent. Number all pages consecutively beginning with the title page. Include five descriptive key words for computer-aided searching.

Abbreviations. Follow the usage established by *Chemical Abstracts.* If others are utilized define on first use.

Figures. Number all figures consecutively with Arabic numerals; legends should be typed together on a separate sheet. Lettering on the original figures should be large enough to take a reduction of 50–60 percent. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than 8½ × 11 in. Grid lines that are to show in the photoreproduction should be inked in black. Photographs should be glossy prints (5 × 7 or 8 × 10 in.) with strong contrasts. X-rays should be right-reading glossy prints. Providing an overlay that indicates the most critical areas of halftones will aid in ensuring high-quality reproduction. Illustrations in color can be accepted only if the authors defray the cost.

Tables. Number all tables in order of appearance with Arabic numerals; type each table double-spaced on a separate page, including a short descriptive title typed double-spaced above the table. Footnotes to tables indicated by superscript lowercase letters, ^{a,b}, etc., should be typed double-spaced at the end of the table. Keep in mind the dimensions of the journal when planning the number of columns in a table.

Footnotes. Text footnotes should be avoided whenever possible.

References. These are to be cited in the text by the author's name and year of publication. References should be listed alphabetically in an unnumbered list at the end of the paper in the following style:

Coleman, D. C., Reid, C. P. P., and Cole, C. V. (1983). Biological strategies of nutrient cycling in soil systems. *In* "Advances in Ecological Research" (A. MacFayden and E. D. Ford, Eds.). Vol. 13, pp. 1–55. Academic Press, New York/London.

Rice, E. L. (1984). "Allelopathy," 2nd ed. Academic Press, New York.

Takács, S., and Tatár, A. (1987). Trace elements in the environment and in human organs. I. Methods and results. *Environ. Res.* **42**, 312–320.

The names of journals should be abbreviated according to *Index Medicus*, 1980, or *Chemical Abstracts Service Source Index*, 1985. Include in the reference list articles that are "in press," but "manuscript in preparation," "personal communication," and "unpublished observation" are to be avoided.

Reprints. A reprint order form will accompany the proofs. The corresponding author receives 50 reprints free of charge, and additional copies may be ordered.

Correspondence. Editorial correspondence concerning the manuscript should be addressed to:

Environmental Research
Editorial Offices
Division of Environmental and Occupational Medicine
Department of Community Medicine
Mount Sinai School of Medicine
1 Gustave L. Levy Place, Box 1057
New York, NY 10029

Correspondence concerning manuscripts in production and proofs should be addressed to:
